## Sexy software slammed

Parents must shield their children from sexy software, warns the National Yawert and Literature Association.

The association follows the introduction of a game called Strip Poker from U. S. Data, in which the young ladies depicted on screen can eventually end up naked.

A spokesman for the NYLAA said: "Until there is an effective obscenity law, nothing can be done about this type of software coming onto the market."

"We know of this game, and several others like it. But unfortunately there is very little we can do about them. All we can do is advise parents to keep a keen eye on the software their children are buying."

"Let's face it, children are likely to see much worse by simply picking up their father's disk, paper. Another thing that. Continued on page 5

## Going for gold

Close on the heels of Daley Thompson's gold medal in the Olympics comes a new game from Ocean called Daley Thompson's Decathlon.

Available for the Commodore 64 and the 48K Spectrum, the game recreates the 10 decathlon events — all of which are played under Olympic qualifying standards.

Replays from the game will go to the British Amateur Athletics Board, and a free poster is included with every copy of the game.

To play the game one player takes on the role of Daley Thompson competing against the computer (Spectrum version) or two people can play.

Moves equipped with speech audio will give vocal scores, and a voice saying "on your marks, get set, go!"

David Ward, managing director of Ocean, said: "When Daley won the 100m sprint, he became quite agitated because. Continued on page 5

get to be taken into consideration in this the poker game is a game of skill, and the children will have to be good poker players before they start winning."

There is also a video device built-in to the program. According to Jason Richards, "If parents are playing this game and one of the children suddenly walks into the room, a simple press of a key will take the lady off the screen — leaving only the cards dealt in place."

*From front page*

he could not run any faster than he soon realised what I explained he was competing against himself?"

Cost of the game is £8.95 for the Spectrum, and £7.95 for the CMM 44.

Oscom Software, 4 Central Street, Manchester M21 3NS

## OU pack for Spectrum users

The Open University has made its Master in Schools micro-computer 'Awareness Pack' available for the Spectrum 48K. Spectrum is suitable parents — as well as teachers — to understand the many ways in which children can benefit from the use of computers in the classroom.

The pack is designed for computing 'novices' to bring them to the point where they can connect up, switch on and use educational material on the microcomputer, evaluate its educational potential and understand enough computer jargon to communicate with computer experts.

A total of 15 educational case studies and five examples of schools software are included in the pack, together with step-by-step instructions for loading and use.

The programs come on cassette but can also be used with Microdrive.

Open University, Milton Keynes MK7 6L4

## Spectrum in new catalogue

Electronics features largely in Acorn's Autumn/Winter catalogue which sets the introduction to the firm's stock

range of Sinclair's ZX Spectrum, together with an extended range of electronic typewriters — some with a computer interface facility.

Joining the Commodore 64 and Amiga's XL machine, the Spectrum will be sold by Argus at a price of £129.95.

A selection of peripheral equipment and software is also available for each machine.

This includes the ZX Interface 1, at a price of £26.95, and a touch-screen package on BASIC programming for the Commodore 64 at £24.95.

Argus Distribution, 113 Staines Road, Edgware, Middlesex HA5 7AQ

## Award goes to Acorn

The Queen's Award for Technological Achievement was officially presented to Acorn recently for the BBC Micro, by Sir Peter Proby, the Lord Lieutenant of Cambridgeshire.

Christopher Curry, managing director (left), and Hermann Hinton, chairman (right), are seen here with the award in the presentation reception.

Acorn Computers, Feltwell Road, Cherry Hinton, Cambridge CB3 4JN

## Price cuts for software

From August 31, all Comsoft software will be reduced in price to £4.95.

New software to be introduced, also for the BBC Micro and Acorn Electron, will also be retailed at this new price.

Comsoft Computer Software, 7 Roman Drive, Letch, West Yorkshire LS26 2JW

## Sponsorship for heat of competition

In collaboration with Thomas Polytechnic, Commodore is this year sponsoring the first European heat of the Association for Computing Machinery's International Programming Competition.

The winner will take place at Thomas Polytechnic, London, on Saturday October 26, and two winning teams will be chosen to represent the European region at the final in New Orleans next March.

Teams will consist of up to four undergraduate or post-

graduate students, who will each be set an programming 'problem'. The team which solves them in the shortest possible time will be declared the winner.

Competition will be permitted to program solutions in either Pascal or Fortran, using Commodore 8000 computers linked by means of a Cortex Intercom computer communication interface to a local mini-computer network.

Commodore, 673 Ave. Ave, Slough, Berks SL1 4BG

## American software for UK

High quality American programs are to be produced under license from leading US sources, by a new British company — Salsat.

Initial releases from the company will include Astro Chess and Fly-A-Plane.

All Salsat Commodore 64 products will have the bonus of a British derived fast-loading system, and it is claimed that this will give the Commodore 64's cassette player faster loading times than its disk drive can achieve.

The company will not, however, be ignoring 128K versions — the cassette versions available to date will be a retail price of £9.95 will soon be brought up by the disc option priced at £20.95.

Salsat Ltd, Astorway Drive, Slough, Berks SL1 2JX

## First step into UK market

While Brother has been manufacturing for many years

import the major printers, the launch of the M1009 and M2024 marks the direct entry of the company into the UK market for import for resale printers.

For the home computer user, the M1009 printer is priced at under £200 — bringing within the reach of many home users.

Under a duplex head, the machine gives crisp, clear characters with area discretion.

As well as the full 96 character ASCII character set, the M1009 also has a problem set and mathematical characters.

Standard software on the M1009 is provided (Commercial, while a dual interface (M2024 and Centronics) will be available shortly.

Print speed is at 40 characters per second on normal characters. In addition to normal characters are 96 columns, 48 characters per inch the M1009 will also print at an expanded face (48 columns, 5 cps) or condensed face (112 columns).

The unit will accept paper up to 14in in width which can be sheet fed using friction feed, roll fed using an optional roll holder, or fan fold using an optional fan fold unit. An optional, plus two copies, can be printed at one time.

This machine is maintenance, standard 110mm by 140mm by 40mm and weighs 11kg.

Also new from Brother is the M2024, which combines Near Letter Quality print and 144 character per second disk print.

Mainly for business use, the machine has a 24-pin impact dot matrix print head, which speed is provided by logic making bi-directional printing.

Another 6000 Series computer printer, Simply Smart, Quick-Stroke, Modemless, Modemless or ADM 320.

Are you ready for the age of the **R.A.T.?**

# Steroids — keep track of darts scores

**Don't overload  
this program**  
POKE 2250 and 2251 control board and screen output. Special comments may be replaced with your own or ignored. You may need to replace left bracket with RIGHT ALT or whatever your computer uses. The board is printed directly on the screen, and if you want to try this on your own machine you should experiment to achieve the best looking board. The rest of the program should be fairly standard to most BASIC users and some parts can be typed in directly with no corrections.

As anyone concerned or interested about the success of the program depends upon the comments of the user. All scores entered as fractions — say 26 60/100 will be converted to an integer value.

If you do points 1 or 2 by mistake, page 1. You'll get a "NO MORE TOP SCORE" error but it won't affect your scoring average.

Similarly, if you can see a number a higher than you need, don't enter it. It will be ignored anyway as there will not be give an accurate scoring average.

The one problem is if you enter a wrong value which fits. You will then have to start again to eliminate data entry is essential for a good game without any hitches. The program plays the normal 'the first to win three legs wins the match' and simple counts accompany the history.

The double display will tell you if you need a double if your POINTS LEFT is 40 or below. It won't — unfortunately — tell you when you need a BULLSEYE but this should be easier for you to notice.

**Here's a bonus — two completely different programs from the same author, Andrew Clarke. Whether you're an arcade fanatic or a darts demon, you'll find something to intrigue you here**

# 48K SPECTRUM OWNERS ESPECIALLY MICRODRIVE OWNERS

OCP ANNOUNCE ALL PROGRAMS COMPLETELY REWRITTEN FOR ZX MICRODRIVE COMPATIBILITY & PLUS 80's FOR USE WITH 13 DIFFERENT CENTRONICS/MS232 INTERFACES INCLUDING ZX INTERFACE 1

## ★ FINANCE MANAGER ★ ★ ADDRESS MANAGER ★

£8.95

(BOTH LESS £3 REBATE FOR EXISTING USERS ON RETURN OF OLD CASSETTE)

## ★ ★ 80 COLUMN - 'PLUS 80' VERSIONS ★ ★ £19.95

(LESS £5.00 REBATE FOR EXISTING USERS ON RETURN OF OLD CASSETTE)

Write to us for a quotation for the software, the interface and the latest high performance Japanese Dot Matrix Printer — you will find our prices very competitive.

Both programs are available in standard form which work only with ZX48 and Alphacom 32 column printers, and Plus 80 which work in conjunction with most Centronics/PS202 interfaces and 80 column printers.

**ADDRESS MANAGER** and **FINANCE MANAGER** utilize the same "on the page" presentation and offer 48K Spectrum owners a professional standard address filing, indexing retrieval and financial analysis system. Below are examples of the screen presentations.

Both have been carefully constructed to provide the user with a tool that is extremely friendly and easy to use, the speed and presentation of these programs are second to none.

**ADDRESS MANAGER** features **MULTIPLE INDEXING** via our 3-way 3 character index, an ability to store over 400 full names and addresses or 7000 individual names/initials.

USES include: storing and updating names, addresses and phone numbers; printing out Xmas card lists, etc., mail order work, customer classification by type etc (doctors have used this program to catalogue patients by treatment).

**FINANCE MANAGER** is a powerful, flexible and fast **MENU DRIVEN** general purpose program carefully designed to handle up to 255 separate accounts for domestic and business accounting applications. The magic of **MACHINE CODE** has enabled us to produce the very latest "on the page" presentation which lets you enter and edit data naturally, as if with a pencil and paper.

Voted "The best value financial program available" by Sinclair user.

But that's not all, not by a long way. This program automatically raises a corresponding debit or credit for every entry, and will even open up a new account if an entry features an unrecorded account name.

Accounts can be **MERGED**, **DELETED**, **ANALYSED**, **MASKED** as priority, **RENAME**D, **EDIT**ED and **SCROLLED**. Transactions can be **RECORDED**, **AMENDED**, **DELETED**, **PRINTED**, **DESIGNED** for analysis and **RENAME**D. Standing orders can be **APPLIED**, **REMOVED**, **DESCRIBED**, **AMENDED**, **DELETED** and even **DUMMED** for planning purposes. Other features include **DATE CHANGE**, **RUNNING TOTALS**, 2 **KEYBOARD MODES**, **PRINT PAGE**, **LINE/LOCK/FORM END/FORM START/FORM DATE** etc., **LIST BALANCES**, **FIELD ERASE/INSERT/DELETE**, **EXIT TO BASIC**. You may not want all these features but they are there just in case.

## UTILITIES

£9.95

- ★ MACHINE CODE TEST TOOL ★
- ★ EDITOR ASSEMBLER ★
- ★ MASTER TOOL KIT ★

NEW TO MARKET ZX MICRODRIVE COMPATIBILITY

(Existing users wanting latest versions will receive a £3.00 rebate on return of old cassette)

Until stocks reach **WISNITH** and other retail outlets send cheque or telephone details to 0753 889055.

Replacement tapes only available from OCP direct.

OXFORD COMPUTER PUBLISHING LTD., 4 High Street Chalfont St. Peter, Bucks. SL8 9GB.

SOFTWARE ★ ★ ★ ★ SIMPLY THE BEST

Your slow but steady sailing brings a warning to the bottom left of the screen for you to sail it to the top left where you will receive £1,000.

After that you return to your home port. Sounds easy! Well and you hear about the hazards.

There are four randomly-placed hazards in the sea and an unknown quantity of submerged rocks, which are picked up by your offshore sonar. It only works ahead, above, ahead/above and ahead/behind. The gauge used when you are 100 ft or less.

On the left is the shoreline and, on the left is the 400, also starting to be stranded.

Each boat ship costs £5,000 and refuelling costs £1,000.

So remember the right hand and don't lose any sleep!

Good sailing.

#### Variables

A,B,C,D,E,F,G,H: buoy positions  
I,J: ship positions  
K: money  
M and N: boat with profile  
O and P: rock number and place  
R,G: shoreline

#### Notes on conversion

PILOT did not replace by POINT AT PAPER and the change background and the sound to letters and give double length. SCEN (CLN) = 0 or checks when = 0 (N,Y) position. CHECKED and CHECKED (Y) now sound and click on end of it.

48K SINCLAIR ZA SPECTRUM  
**£9.95**

RECEIVED CONGRESSMAN W. FRANK J. ANDERSON, JR. August 1964. Page 27

## Electro-Art 52K Electron £14.95

Quake, 12 Palmerston Rd,  
Southampton SO8 1LL

Originally written for the BBC, the program allows you to convert your TV screen as a canvas on which you can create and display a wide variety of patterns.

You can choose from eight players and the aid for drawing. The layers are well chosen and are far away from the first line. There is nothing more interesting than combining patterns. The back left and right are also of good work.

After drawing it shows you the given a picture for filling in the chosen colour. Unfortunately I was unable to make this work and ended up leaving my drawing.

Several other features allow you to make various changes.

There are also eight drawing colours which will brighten up your drawings. The only thing I found lacking is a feature to correct any mistakes instead of redrawing I decreased the brightness of the background and to reconfigure the screen. It's not satisfactory but it helps.

After you have created your masterpiece you can save it to tape and use it later. Apart from the minor bug, the program helps produce excellent pictures. Who knows — you may be the modern Da Vinci.

## Autocalc 64 CBM 64 £14.95

Richard Sheppard, Box No  
21 21 Elmston Ln, Clapton,  
Waltham, Essex

To run a software company has to be a product I consider when the house contains a lot of effort. Autocalc contains most of the features of higher priced spreadsheets and is the same high standard — but costs a fraction of the price.

A spreadsheet program is a matter of form. Each 64 has a similar way, numbers into it is performance calculation. Using the spreadsheet you can change formulas to contain formulas to that is given in filled in you can automatically take account, work, calculation results. The feature is that you can change the formula you can change the box and it will calculate the result.

which has been updated.

Autocalc contains all the standard spreadsheet functions (the usual 40 cells) and formulas and working. Memory support can be specified as integer, decimal, or decimal, or floating point. Both left and right justification of text lines are available. You can also specify how calculations are to be carried out, by columns or rows.

My only complaint about the package is that it cannot be saved to printed program state, the only part. Only problems calculated in the actual data may be saved.

## Moths Utilities Pack 1 (Vols 1 & 2) Spectrum £9.50

Malcolm, 4 Calcutt St, Marple,  
Cheshire, CH18 4LL

Volume 1 contains a great variety with the options of a wide range of functions to add and subtract, high or low. You input the function and the program will calculate the result. The program then shows the calculation, the result and finally shows the result. It is a very simple program, but it is a very useful program. It is a very useful program, but it is a very simple program.

The second volume contains a great variety of functions to add and subtract, high or low. You input the function and the program will calculate the result. The program then shows the calculation, the result and finally shows the result. It is a very simple program, but it is a very useful program.

A third volume contains a great variety of functions to add and subtract, high or low. You input the function and the program will calculate the result. The program then shows the calculation, the result and finally shows the result. It is a very simple program, but it is a very useful program.

After several questions are answered you are expected to enter the coefficients of a polynomial and the constant term.

The program then shows the result of the calculation. It is a very simple program, but it is a very useful program.

## Complete Machine Code Tutor 52K BBC £14.95

New Generation, Brix, Avon

If the thought of programming in machine code daunts you to begin with, this code tutor will help you to learn the basics of machine code and then move on to more complex programs.

The package contains 20 lessons, each of which take you through the steps of writing a program. The first lesson is a simple program, and the last is a more complex program. The package also contains a number of other programs, including a calculator, a text editor, and a file manager.

Lessons are divided into three sections: basic, intermediate, and advanced. Each section contains a number of lessons, each of which take you through the steps of writing a program.

During the first lesson I have used this package I have found it very useful. It is a very simple program, but it is a very useful program.

## Moths Utilities Pack 2 (Vols 3 & 4) Spectrum £9.50

Malcolm, 4 Calcutt St, Marple,  
Cheshire, CH18 4LL

A new teaching program which allows you to learn the basics of machine code. The program is divided into two sections: basic and intermediate. Each section contains a number of lessons, each of which take you through the steps of writing a program.

During the first lesson I have used this package I have found it very useful. It is a very simple program, but it is a very useful program.

The contents of Volume 2 are, essentially, a continuation of the material in Volume 1. It contains a number of lessons, each of which take you through the steps of writing a program.

# The Key To Success!

Now, with the new Stonechip Spectrum Keyboard, the user has no worry of damaging the Spectrum itself as improved designing enables it to fit the case perfectly.

Assembling the case is simple as it consists of two halves, the top half containing the keyboard, with a small printed circuit board, attached by ribbon cable, plugging into the rear of the Spectrum. The lower half fits precisely around the Spectrum, thus preventing any risk of damaging through movement.

Your Sinclair guarantee need not be invalidated since the Spectrum does not require removal from its case.

## THE MAIN FEATURES OF THE KEYBOARD ARE

- ☐ No modifications to Spectrum necessary as it connects via rear port
- ☐ Full-length space bar
- ☐ Built-in 'Echo' amplifier and tape interface
- ☐ RESET keys remove the need to disconnect power supply lead
- ☐ Single key 'DELETE'
- ☐ Single key 'Extended Mode' selection (ie one key replaces the CAPS SHIFT and SYMBOL SHIFT functions)
- ☐ Fully compatible with Interface 1 and most peripherals.
